

STAINLESS STEEL CABLE TIES

Self-Locking Ties

316 Remora Stainless Steel

The Ball Lock range of stainless steel cable ties are manufactured from 316 stainless steel and have a high tensile strength. The self-locking head design speeds installation and locks into place at any length along the tie. The fully enclosed head does not allow dirt or grit to interfere with the locking mechanism. These ties are flame-proof, tough and corrosion resistant and are ideal for demanding industries such as mass transit, ship building, oil rigs, and mining.

The Ball Lock range is available in bare stainless steel or coated with halogen free pure polyester/epoxy in Black as standard or Blue, Green, Red and Yellow to order.

Locking Mechanism

- The strap is locked into the head by means of the small ball-bearing.

- The ball locks into the small end of the wedged shaped housing.

- Forming a positive locking with the strap.

- Rounded edges for safe handling.

Features and Benefits

- High tensile strength.
- High temperature range.
- High abrasion resistance.
- Rounded edges for safe handling.
- UV resistant.
- Flame-proof and Halogen free.
